WeldKing® **CoolArc200** direct current (DC) STICK/TIG welder is built with state of art 35K IGBT technology. At just 15 lbs. (7kg), the CoolArc200 generates up to **200** amps output at **50%** duty cycle and burns 5mm (3/16 inch) electrode without any problem.

### Process:

- ▽ STICK(SMAW)
- ▽ TIG(GTAW)

### Applications:

- ▽ Metal fabrication
- ▽ Construction
- ▽ Mechanical Contractors
- ▽ Automotive Repairs
- ▽ Farms & Ranches
- ▽ School and training facility
- ▽ Maintenance & Repairs
- ▽ Training facility
- ▽ Light industry

**Wide Voltage Adaption™ (WVA)** multi-input voltage regulation technology where the solid state circuit replaces contactor, allows CoolArc200 to tolerant input voltage variation from **90V to 460V** seamlessly.

**Arc force** prevents the electrode from sticking to steel when coming too close.

**Anti-stick** will reduce the output current after senses the electrode contact with the metal for a prolonged period.

**Hot Start** boosts the current during starting to ignite the arc quickly and reliably.
